Improving clinician's competence and confidence in integrating digital technology into assessment and treatment

Child and Adolescent Mental Health Service

14 March 2017

Commissioner for Children and Young People
Western Australia

Professor Jane Burns

2016-17 Thinker in Residence

What the report found

- The current system is
 - poorly planned
 - poorly integrated
 - a "massive drain on people's wellbeing"
- Has major deficiencies & a lack of support for people who are discharged from hospital after attempting suicide.

Recommendations

Contributing lives,
thriving communities

Report of the National Review of Mental Health Programmes and Services

Summary

30 November 2014

 Australian Government
National Mental Health Commission

IMPROVE ACCESS TO SERVICES AND SUPPORT THROUGH INNOVATIVE TECHNOLOGIES

Improve emergency access to telephone and internet-based forms of crisis support and link crisis support services to ongoing online and offline forms of information/education, monitoring and clinical intervention.

Implement cost-effective e-mental health solutions that build sustained self-help, link to biometric monitoring and provide direct clinical support strategies or enhance the effectiveness of local services.

IMPROVE ACCESS TO SERVICES AND SUPPORT THROUGH INNOVATIVE TECHNOLOGIES

Improve emergency access to telephone and internet-based forms of crisis support and link crisis support services to ongoing online and offline forms of information/education, monitoring and clinical intervention.

Implement cost-effective e-mental health solutions that build sustained self-help, link to biometric monitoring and provide direct clinical support strategies or enhance the effectiveness of local services.

NATIONAL MENTAL HEALTH COMMISSION OUR RECOMMENDATIONS ON TECHNOLOGY

A SYSTEM REIMAGINED // MENTAL HEALTH REFORM THROUGH INNOVATIVE TECHNOLOGIES #NMHCReport

YOUNGANDWELL
Cooperative Research Centre

// INTEGRATION

Align, consolidate and integrate the use of e-mental health technologies with the existing mental health system.

// RE-ORIENT THE SYSTEM

Technologies allow for a tailored approach on a mass scale, placing the individual at the centre of their own care.

// LEADERSHIP

The sector is in need of strategic and transformational leadership in order to move into the 21st century.

// FUTURE-PROOFING THROUGH RESEARCH AND DEVELOPMENT

Leverage new and emerging technologies to develop integrated digital products and services that deliver effective services and augment face-to-face care.

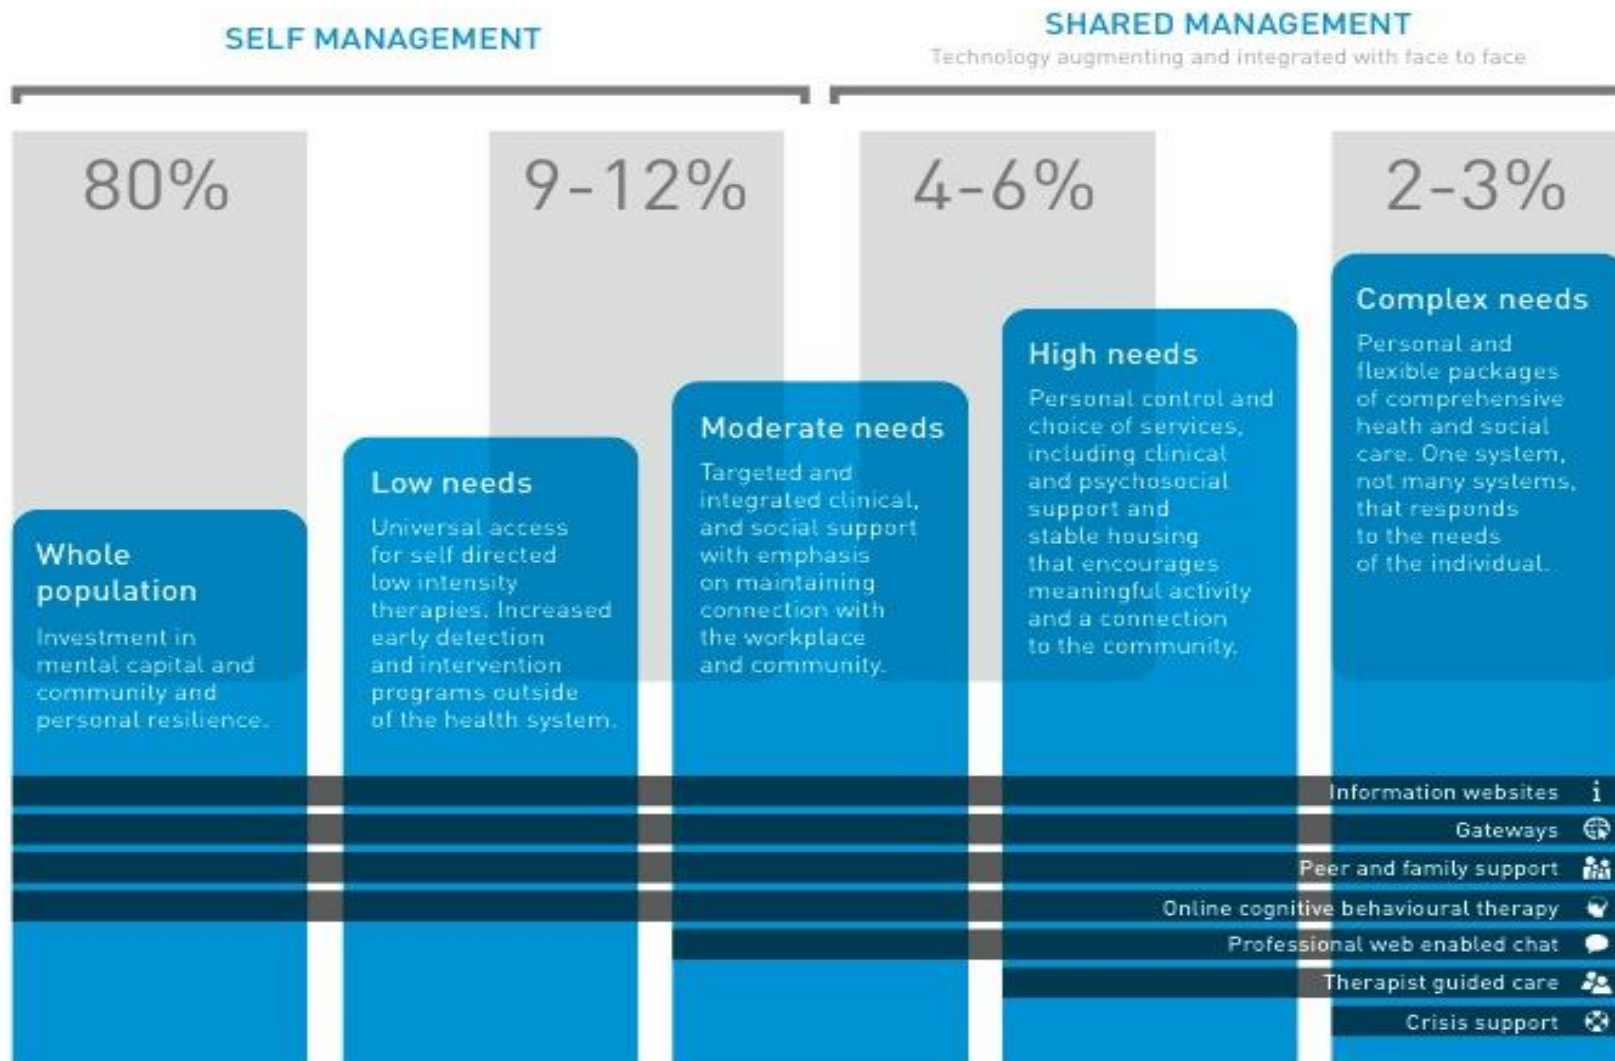

// SUSTAINABLE FUNDING

Transform how the sector is funded through innovative business and funding models for sustainability (such as Public Private Partnerships; social impact bonds, etc)

Policy imperative - right care at the right time in the right way

Ten challenges facing service providers ...

- 'UBERisation' of health care – how to respond to disruptive innovation in mental health – e.g. eMentalhealth & community awareness
- Uncertainty in government expectations & need for policy clarity – 'low intensity services', 'packaged care', 'stepped care' etc
- Capability for collaboration & to facilitate co-design
- Flexibility & agility to respond to opportunity & regional/local planning
- Getting to meaningful & effective change – transition pain
- Capacity, investment for development vs. service delivery
- Empowering those with Lived Experience
- Understanding 'Stepped care' or clinical staging
- Suicide & Suicide Prevention – lack of data, lack of expertise, Aboriginal & Torres Strait Islander suicide
- Moving from a focus on outputs to outcomes & results based payment

EXTRAS

UP3™

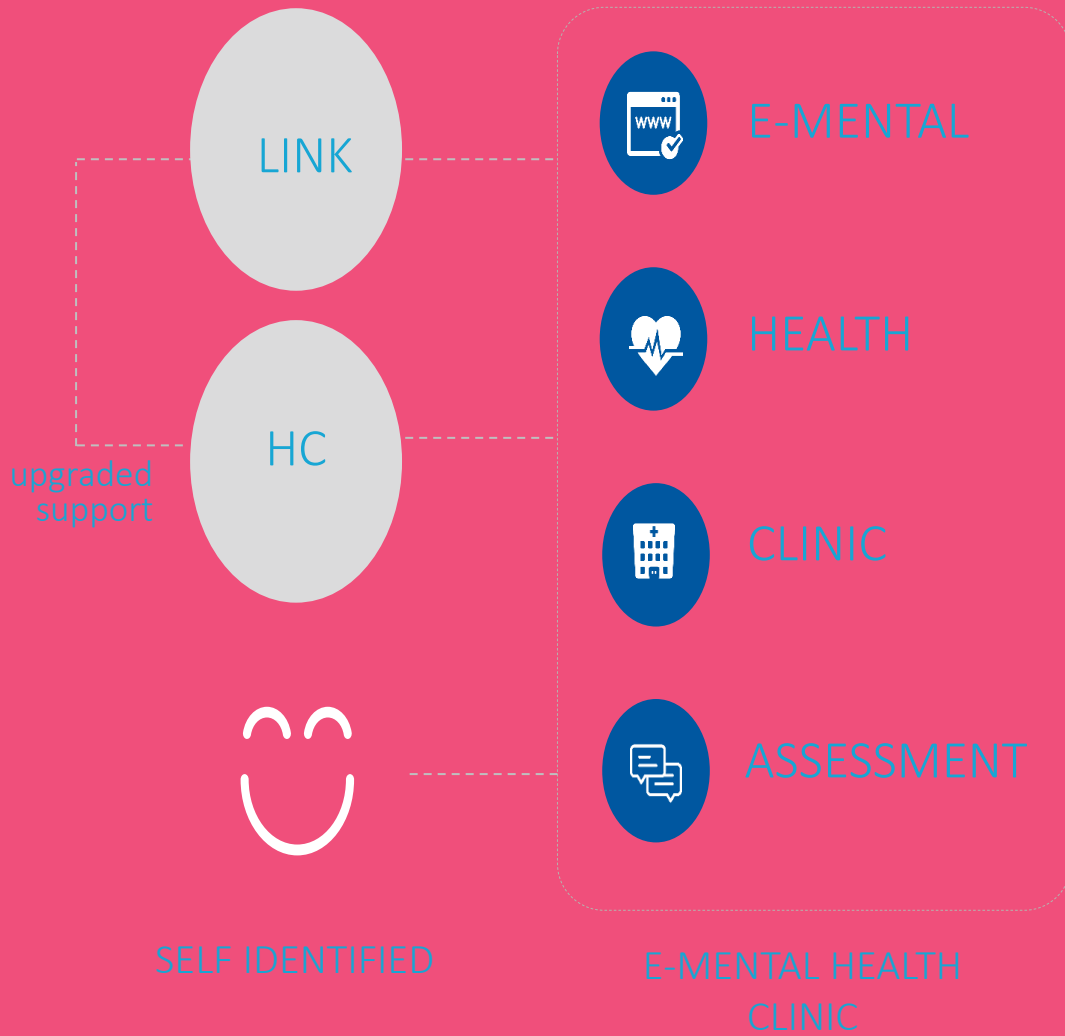

The world's most advanced tracker.

Everyone has had a life-changing experience sometime. This is one of those times. UP3™ is simply the most advanced tracker you can buy. Its classic, durable design will stand the test of time. Multi-sensor technology adds breadth and accuracy to Smart Coach. Everything about UP3 says that the bar has been set higher. Wear one and go further.

With Advanced Activity, Advanced Sleep, Food Logging, Smart Coach and Heart Health

CHALLENGES IN SERVICE DELIVERY

// Research Questions

- **HELP SEEKING** // Why don't young people seek help? Is user driven screening appropriate? What does online triage look like?
- **CONSUMER ENGAGEMENT**// Can young people be partners in care? What would an empowered consumer manage online?
- **COMPLIANCE TO TREATMENT**// Are social networking, gaming, digital content creation, mobile applications and virtual worlds a valid and reliable tool to enhance compliance?
- **WORKFORCE CAPACITY**// What role can technology play in rural, remote and regional communities and in vulnerable populations? How do you up skill a workforce in the use of ICT?

“It was 1.30am; I was desperate and had nowhere to turn. I somewhat sarcastically went to Google and typed in ‘help’. The Reach Out site was the first result.”
